Here and There

M.A. Exhibition open for business

ORGANISING an exhibition of any type is never an easy accomplishment and when the subject is model aircraft then the headaches come fast and furious! But we felt that such an exhibition was long overdue in view of the continual growth of the model aircraft movement in the thirteen years since the end of the war. And it may be as well to point out here that this expansion has not been confined to this country alone, but includes such distant places as Australia, Russia and Japan, to mention but three. In fact, in practically every country in the world people are building and flying model aircraft, and obtaining a great deal of pleasure and satisfaction from a hobby that has a tremendously wide scope.

It was the latter that proved to be the chief stumbling block when it came to presenting an exhibition for model aircraft enthusiasts and at the same time attempt to attract newcomers to the hobby. However, we were pleasantly surprised at the immense enthusiasm for such an exhibition and our task was eased considerably by the interest shown towards the project by fellow enthusiasts, and their help and advice so freely given. Just how well we have succeeded will be difficult to ascertain until after the exhibition has closed, but we can say that this is only the first of what we hope is going to be an annual event for modellers.
