This series of models is truly outstanding because it offers the modeler realistic scale looks along with enough high performance to do loops, rolls, etc! And yet just as the real planes were designed to offer stability and docile handling, these scale models are easy to fly. Also they are beautifully packaged and a joy to build.

Q.B. 15H

IT'S A 'Snap' TO BUILD

SPAN: 49.5 in.
AREA: 409 sq.in.
ENGINE: .15
RADIO: 2 - 3 channel

The QB 15H has become our most popular 15 engine size sport trainer or Sunday flyer model. The reason for this is simple, it is a model which looks great, is priced right, is unusually easy and fast to build, and it flies like a dream. The QB 15H features; clear front and side windscreens, glass filled nylon motor mount, steerable nose gear, hand machined and die cut balsa and plywood parts that are numbered for easy assembly, full size plans and most hardware. The wing leading edges are notched and machine shaped. These and lots of other extras make this our most popular training model.

Glow Plug Connectors

WITH GLOW PLUG & BATTERY CHECKER

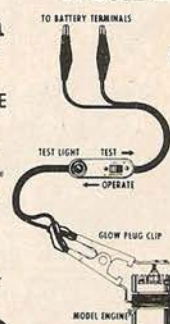

With Internal Connection
FOR HELICOPTERS
OR ANY
SCALE MODEL USE

This Glow plug connector comes with a permanent internal connection for the glow plug. This is great for planes and helicopters where the engine is hard to get to, or where you wish to retain a more scale appearance! The female plug easily mounts thru the fuselage sides, leaving only a small hole visible. All you do is plug in the male jack and you easily start your engine. Features a battery and glow plug condition checker!

\$4.99

With External Clip
FOR AIRPLANES

This Glow Plug Connector is for use with model airplanes or any other model where the engine is exposed. It comes with a Hobby Shack "Kwik Clip" which quickly and easily attaches to your engine glow plug for fast, safe starts. Features a battery and glow plug condition checker!
