U-CONTROL FLYING MODEL KITS

The answer for the novice to control line flying – a quality kit plus engine plus all basic building and flying hardware all included in one attractive pack

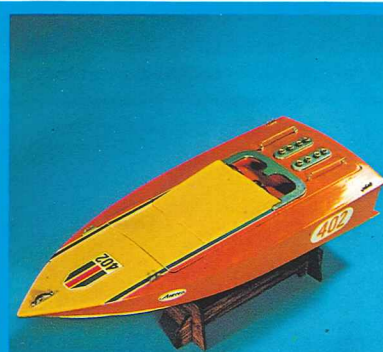

Two versions available –
Beginner (1.5 c.c. size engine)
Intermediate (2.5 c.c. size engine)

ACCESSORIES

A full range of quality accessories is available, catering for the needs of all modellers, but priced to provide true value for money.

new products

BOATS

A range of Aero-Flyte model boat kits will be released shortly. These kits will be of the same high quality and degree of finish as our trusted range of model aircraft kits. Boat kits to be released include from small outboard powered "swimming pool" types to high performance engine powered radio controlled units.

NEW RELEASE
"Economy" sets in 4 and 5 channels - now a quality R/C system for an even lower price.

AEROFlyTE

sanwa radio control systems

Features:

- * Precision ball bearing stick gimbals with smooth precise operation. Ratcheted trim levers.
- * Rechargeable nickel cadmium battery packs for both transmitter and receiver with dual output charger provided (except 2F-2M set)
- * RF power output meter
- * Servo trays now standard equipment in all SANWA sets.

These systems offer the best value available for both the sports and competition modeller. The reliability of these systems is outstanding, combining high transmitter output with excellent receiver sensitivity to provide reliable operation even in interference prone areas.

SANWA 1/12th scale racing cars complete with 2 Channel electric powered proportional radio systems.

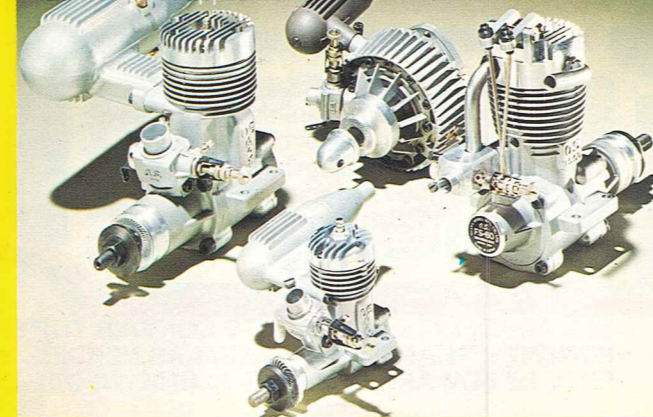

gloplug engines

FUJI
The recently redesigned Fuji range of model engines now represent excellent value for money for the sport flyer, and are featured as a power unit in many Aero-Flyte kit designs.

O.S. MODEL ENGINES.

High Quality and outstanding performance are the features of the O.S. range of model engines. All O.S. engines have been designed to provide long life, but still giving maximum performance, particularly in the larger Radio Control applications.
